

Weekly Cold-related Illness Surveillance Report

January 15, 2020 Reporting for January 7, 2020 to January 13, 2020

National Weather Service Forecast: No current advisories. Wind Chill Advisories Declared During the Previous Week: 0

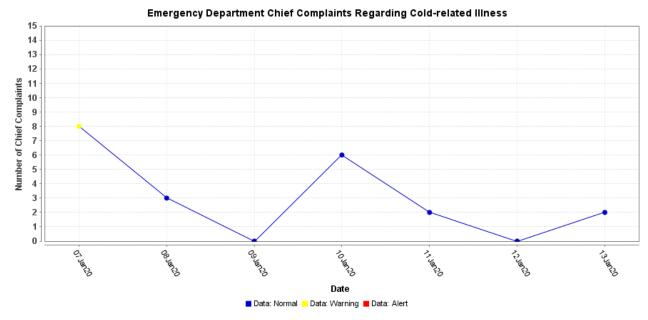

Total Wind Chill Advisories Declared This Winter: 0

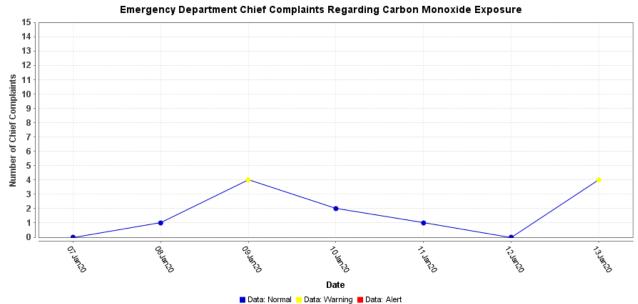

Wind Chill is only calculated for temperatures below 50°F and wind speeds above 3 mph

Note on Emergency Department Data: The results from the query used in ESSENCE, an electronic biosurveillance system, to track cold-related illnesses may be an overestimation of the actual burden of illness related to the cold weather. This overestimation is due to the nature of the query, which includes the term hypothermia and frostbite. As of November 2019, visit data from 23 urgent care centers are now included in ESSENCE emergency department visit data.

Note on EMS Data: These data are based on EMS pre-hospital care reports where the EMS provider has selected hypothermia as a primary or secondary impression of a patient's illness. This impression is solely based on the signs and symptoms seen by the provider, not on any diagnostic tests. Since these numbers do not include all primary or secondary impressions that may be seen with cold exposure, the actual numbers may be low. These data are reported for trending purposes only.

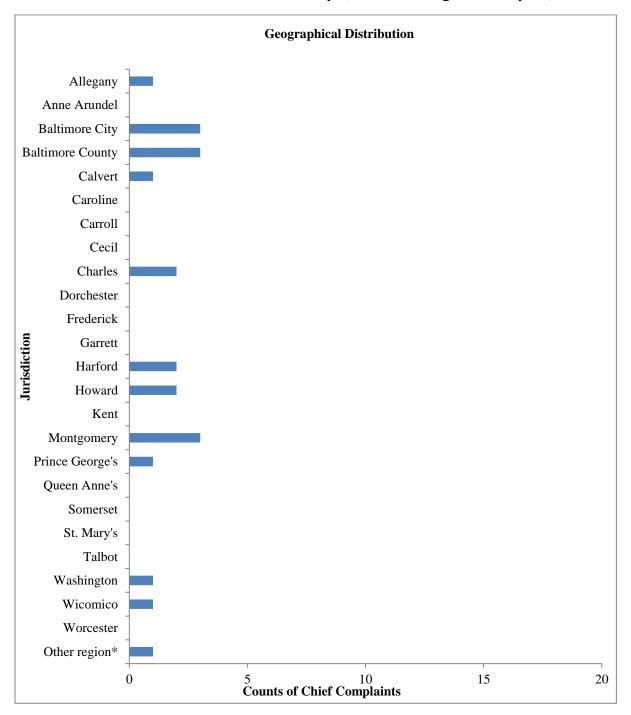

Date	Number of Chief Complaints	Number of Chief Complaints Regarding	
	Regarding Cold-related Illness	Carbon Monoxide Exposure	
January 7	8	0	
January 8	3	1	
January 9	0	4	
January 10	6	2	
January 11	2	1	
January 12	0	0	
January 13	2	4	

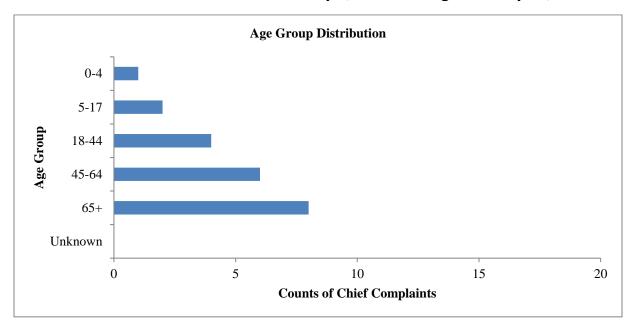

*Note: ESSENCE chief complaint query for cold-related illness contains the following terms: frostbite, frostnip, hypothermia, chilblain, and trench foot

Geographical Distribution of Emergency Department Chief Complaints Regarding Cold-related Illnesses for January 7, 2020 through January 13, 2020

^{*}Geographical distribution of emergency department chief complaints is based on patients' jurisdictions of residence. The "Other Region" category includes patient records without a ZIP code and patients who reside outside of Maryland.

Age Group Distribution of Emergency Department Chief Complaints Regarding Cold-related Illnesses for January 7, 2020 through January 13, 2020

Report continued on next page...

Total Number of Cold-related Deaths	Jurisdiction*	Age Group	Gender
10	Baltimore City	45 – 64 Years Old	Male
	Carroll	45 – 64 Years Old	Male
	Out of State	45 – 64 Years Old	Male
	Somerset	45 – 64 Years Old	Male
	Baltimore County	45 – 64 Years Old	Male
	Prince George's	45 – 64 Years Old	Male
	Baltimore City	45 – 64 Years Old	Male
	Baltimore City**	45 – 64 Years Old	Male
	Baltimore County	65+ Years Old	Male
	Anne Arundel	65+ Years Old	Male

^{*}Refers to the jurisdiction where the death occurred. **Refers to a newly listed death ^Refers to updated information from OCME

There was one cold-related death reported this week. This individual was not suspected or presumed homeless.

There have been ten cold-related deaths during this reporting period. Four individuals were suspected or presumed homeless.

Wind Chill Advisory/Warning Criteria: The National Weather Service issues a Wind Chill Advisory for projected wind chill factors of -5°F to -25°F, and a Wind Chill Warning when the projected wind chill is for -25° or less.

Suspected Homeless Death Data: Office of the Chief Medical Examiner (OCME) Field Investigators use the U.S. Department of Health and Human Services (HHS) <u>homeless definition</u> to determine suspected homeless deaths. Homeless deaths are listed as suspected due to the limited information available to the Field Investigators at the time of investigation, which may result in some misclassifications.
